

Fabtech Sterling to set up facility

SANDEEP MENEZES

Fabtech Sterling Building Technologies, a joint venture between Fabtech Technologies International Pvt. Ltd, India, and Sterling Building Systems, Australia, plans to set up a panel fabrication facility on two acres of land at Khopoli near Mumbai, Phiroz Mansuri, Director, Fabtech Sterling, told Projectsmonitor.

The Mumbai-based company, which offers a range of prefabricated and pre-engineered concrete form systems for commercial, residential and industrial applications, is in the process of purchasing land and the project will be completed

within the next three to four months, Mansuri said. The facility would initially have a production capacity of around 22,000 sq. metres a month, he added.

"The project will be funded from internal resources," he said.

The company also intends to purchase another two acres of land adjacent to the current plot for future use.
